About Client

Client's provides enterprise-class email archiving, eDiscovery, and business continuity software solutions for Microsoft Business Applications on Microsoft Windows platforms and delivers affordable enterprise level functionality. Their email archiving and eDiscovery solutions have hundreds of deployments with an exceptionally high degree of customer satisfaction. Founded in 2003, the company is headquartered in San Jose, California.

Engagement Scope

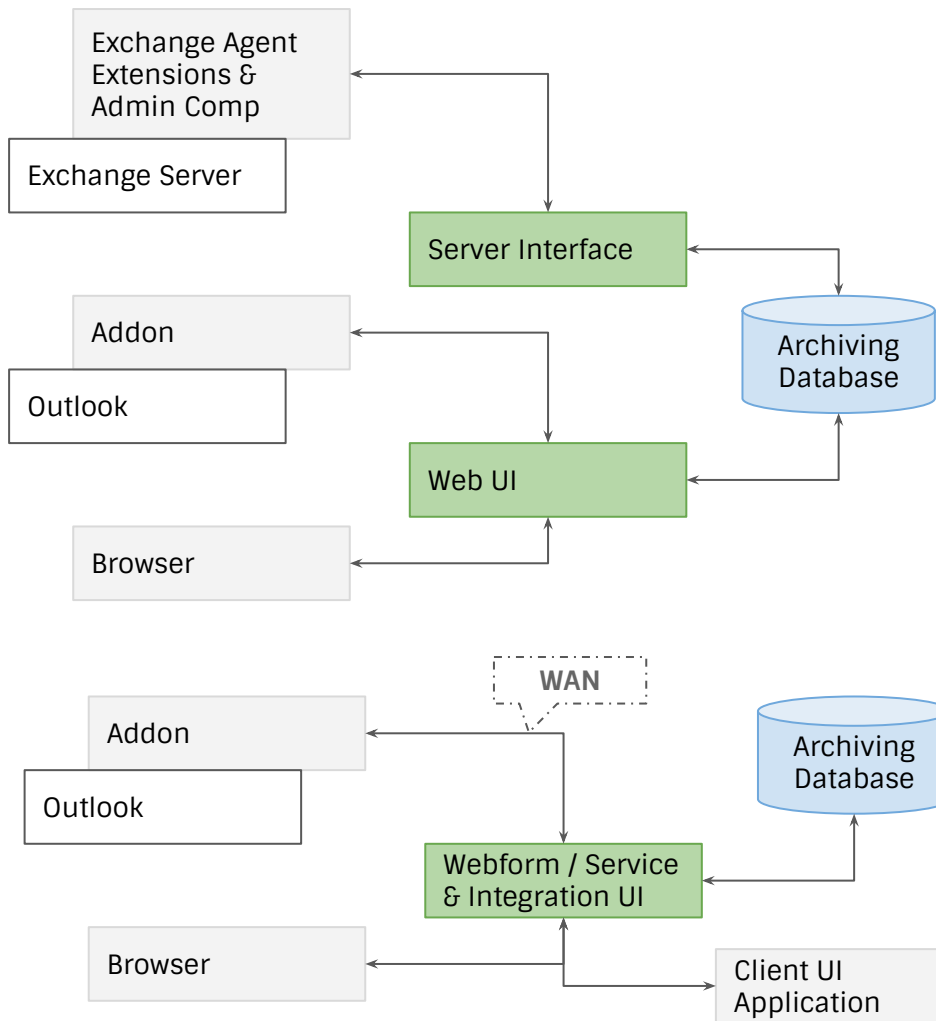

Integra helped the client to build and maintain the application with additional features for customers and according to market needs.

- Research and development
- Solution design
- Upcoming exchange version support
- Unit and System Testing
- Technical and user documentation
- Customized solution
- Technical upgradation

Solution

Integra built an on-premise email archiving and eDiscovery software solution that is specifically designed to work with Microsoft Exchange Server environments.

- Securely archives and indexes all email along with attachments in near real-time.
- Powerful eDiscovery tools that produce only the exact emails very fast.
- Process-driven eDiscovery workflows allow for collaborative efficiency for key groups including legal, HR, and finance departments.
- Data export in multiple formats.
- Ease of use for end users to search and retrieve their own archived email through an Outlook-like folder structure interface.
- Reduce file size of an exchange server by upto 80%.
- Satisfies most regulatory compliance laws and can prevent legal exposure through its content identification, sampling, and collaboration tools. All email that is placed on legal hold will be safeguarded from expiration.

Technology Highlights

- C++, VC++, .NET
- VBScript, VBA, Shell script, PowerShell, EWS
- Multi-threading, TCP/IP, SMTP, HTTP, HTTPS, MAPI
- Openssl, sendmail, PKI, Edk
